

# / SAFELOCK

At **GD Energy Products**, improving product safety while maintaining functionality and durability is our top priority. That's why we developed SafeLock, our new hammerless drilling module valve cover lock – eliminating the dangerous, time-consuming task of break hammering 65+ pound valve covers every time you need to enter the fluid end.

- ▶ **Eliminates safety hazards through hammerless design**
- ▶ **Reduces a multi-minute process down to a few seconds**
- ▶ **Increases maintenance efficiency**
- ▶ **Corrosion resistant threading**
- ▶ **Grease zert to keep threads lubricated between service intervals**
- ▶ **Robust handle design for increased leverage and ergonomics**
