

Power. Quality. World-Class Service & Support.

BUILT IN

GD ENERGY PRODUCTS HDD SERIES PUMPS

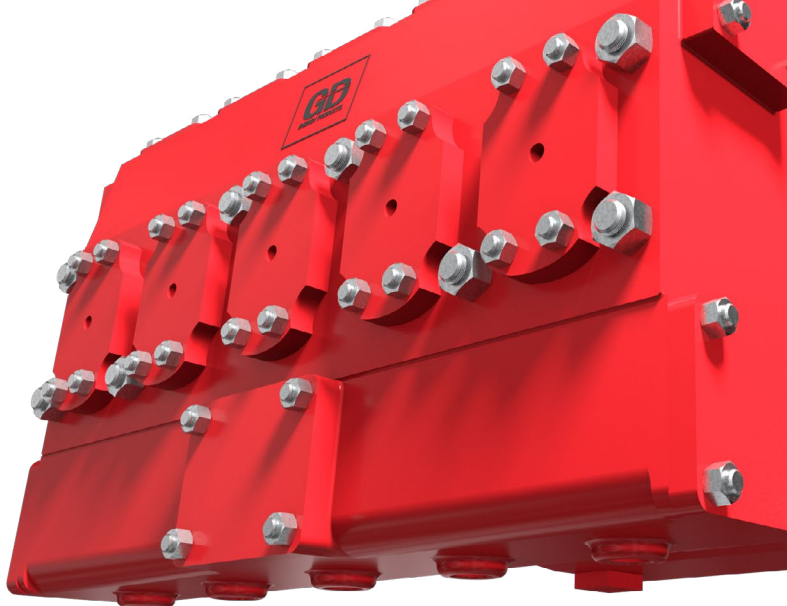

When it comes to horizontal directional drilling, reliability is everything—and downtime is never an option. From performance to power to service, you need to know that the HDD pump you put on the job is going to deliver every time. And that's exactly what GDEP HDD Series Pumps were built for.

Designed with over 160 years pumping technology behind it and built with the highest quality materials and craftsmanship in America, each HDD pump gives you the confidence to take on the toughest projects in less time and get you on to the next job. And if you ever need service or support, GDEP has the technicians, field service and nationwide locations ready 24/7 to keep you up and running—that's our promise.

WE BUILD CONFIDENCE

PERFORMANCE BY DESIGN

Starting with innovative engineering, our HDD Series Pumps are expertly designed using our best-in-class pumping technologies to create pumps that can deliver the raw power you need at 60% lower RPMs than competitors—the high output, flow and pressure you need with less wear and tear.

THE RIGHT PARTS AT THE RIGHT TIME

GDEP is ready with our Parts On Demand service. This streamlined service offering gets the right part and consumables to you—where and when you need it. Because we stand behind the quality of our pumps, parts and consumables, everything we make is backed by warranty.

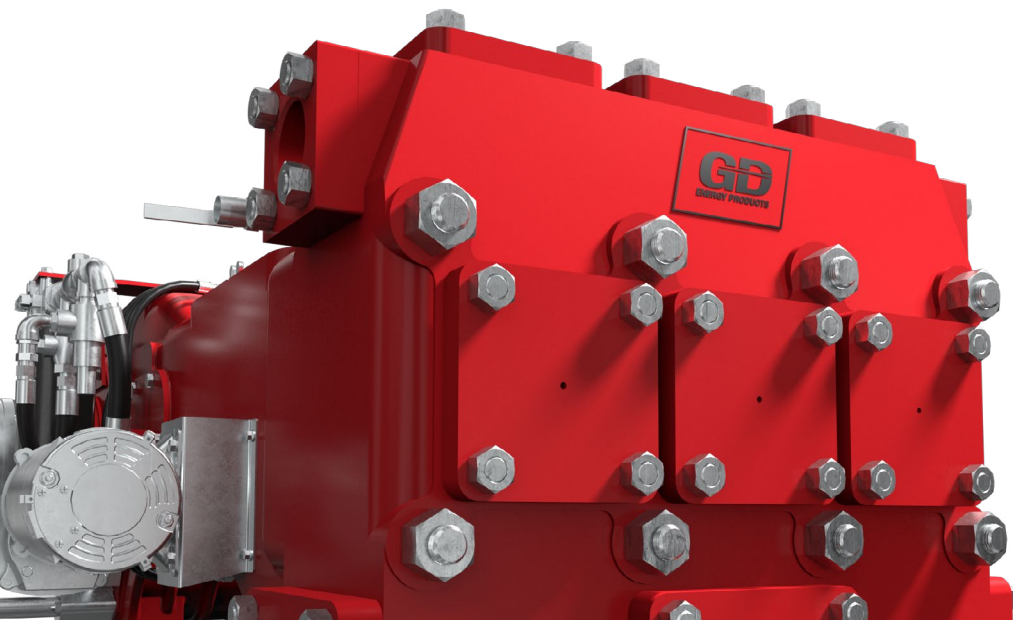

BUILT IN SERVICE AND SUPPORT

Along with the warranty that comes with every pump, GDEP HDD Series Pumps are backed by an unparalleled network of support and service. With service locations and facilities throughout the US and around the world, GDEP customer service is available 24/7 for repairs, maintenance, field service and support. If your pump is down and there is no time to repair it, our Core Exchange Program allows you to exchange it out with a GDEP replacement pump to keep non-productive time to a minimum. Simply put, our service truly sets us apart.

LET US GO ABOVE AND BEYOND FOR YOU
