

CORE EXCHANGE PROGRAM

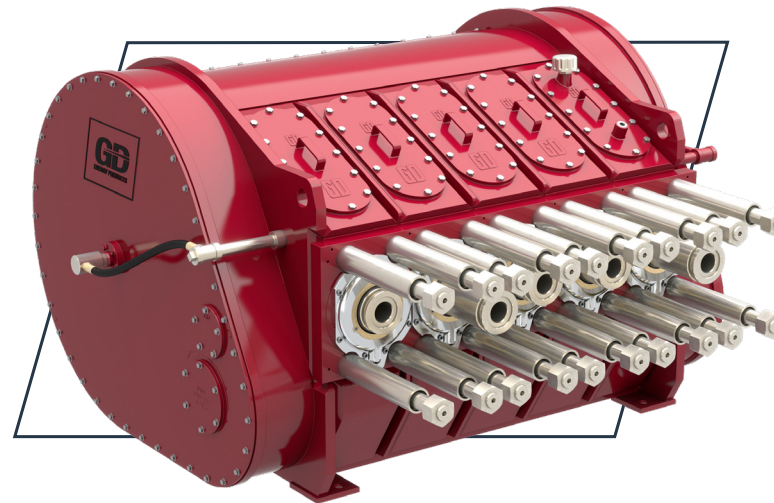

THERE'S NO TIME FOR DOWNTIME.

GDEP's Core Exchange Program is an equipment-exchange service solution designed to get you back up and running as fast as possible, no matter the make and model of your pump. Simply provide us with the power end in need of service and we will exchange it with a fully remanufactured, factory-certified replacement that is fully tested and painted to your specification.

STEP 1

When a pump goes down in the middle of a frac job, you start to lose money fast — Call us!

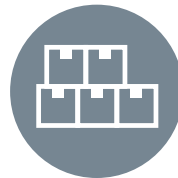

STEP 2

We can send a certified remanufactured power end within 24 hours. Our field service team is also available to assist with the replacement installation if needed.

STEP 3

GDEP puts each failed power end received through a rigorous, quality inspection process and rebuilds to the same high OEM standards before you receive them.

STEP 4

Our field service team stands ready 24/7 to assist with installations, as well as inspections and repairs. We hold a large ready-to-go inventory of remanufactured power ends across our portfolio of high-pressure pumps which ranges from 2,250 hp up to 5,000 hp. All remanufactured cores are factory-certified with OEM parts and backed by a 6-month warranty.

WE CAN PROVIDE A CORE EXCHANGE FOR ANY FRAC PUMP, EVEN IF IT'S NOT OURS. OUR SERVICE TEAM STANDS READY 24/7 TO AND GET YOU BACK UP AND RUNNING, TODAY.
