

THUNDER 5000

Redesigned with horsepower in mind

1

Upgraded, robust frame design with stronger welds to boost structural integrity

2

5,000 HP allows for fewer pumps in operation which reduces maintenance costs

3

Reinforced gearbox assembly to withstand higher horsepower

4

11-inch stroke length allows greater flow at slower operating speeds reducing consumable costs and increasing pump life

5

Optimized fluid end design provides more than 2x life of competing pumps

6

Utilizes GD Energy Products' innovative Redline Series consumables to extend fluid end life in the harshest conditions

7

Multiple gearbox options offer compatibility with any drive train option for maximum flexibility
